

This lecture presents a summary of more than 30 years of work on geotextile and granular filters by the author. A rational approach to the development of filter criteria is presented in a lively manner using a large number of animated slides.

In 2005, Dr. Giroud has been awarded the status of "hero" of the Geo-Institute of the American Society of Civil Engineers (ASCE) and has delivered the prestigious Vienna Terzaghi Lecture in Austria.

June 12th, 2008

inaugural

The Golder Associates Distinguished Lecture Series

Criteria for geotextile and granular filters

by Dr. J.P. Giroud

Reception:

2pm Chernoff Hall Atrium

Lecture:

3pm Chernoff Hall

Room 117

90 Bader Lane,
Queen's University
